

Full Stack Development with MERN

Project Documentation format

1. Introduction

- Project Title: House Hunt
- Team Members:

Kandavalli Prem Sagar (TeamLead)

Chandan Korivi (Member)

Baggu Pravalika (Member)

Lavanya Karuku (Member)

2. Project Overview

- Purpose: A centralized platform to connect property owners with prospective renters, simplifying property discovery, listing, and booking processes.
- Features: User authentication, property listing for owners, property search and filtering for renters, real-time booking management, and an admin dashboard.

3. Architecture

- Frontend: Built with React.js using Tailwind CSS to provide a fast, responsive, and dynamic user interface.
- Backend: Developed using Node.js and Express.js, providing robust RESTful API endpoints.
- Database: MongoDB (NoSQL) is used for scalable storage of user profiles, property details, and booking transactions.

4. Setup Instructions

- Prerequisites: Node.js, MongoDB, Git.
- Installation: Clone the repository. Run 'npm install' in both the 'client' and 'server' directories. Set up .env variables for PORT, MONGO_URI, and JWT_SECRET.

5. Folder Structure

- Client: Contains the React frontend, structured into components, pages, context/redux for state management, and assets.
- Server: Contains the Node.js backend, organized into controllers, models, routes, and middleware.

6. Running the Application

- Frontend: 'npm start' in the client directory.
- Backend: 'npm start' (or 'npm run dev') in the server directory.

7. API Documentation

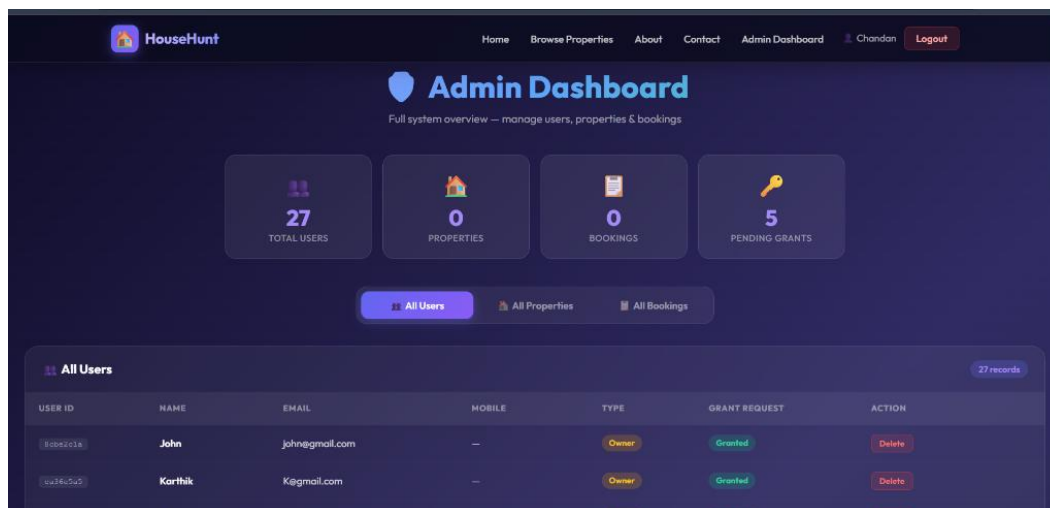

- /api/auth: Handles user registration and login (POST).
- /api/properties: CRUD operations for property listings (GET, POST, PUT, DELETE).
- /api/bookings: Manage booking requests and status updates (GET, POST, PUT).

8. Authentication

- Uses JSON Web Tokens (JWT) for secure state-less authentication. Passwords are encrypted using bcrypt before being stored in MongoDB.

9. User Interface

Screenshots showcasing different UI features:

10k+ PROPERTIES

5k+ HAPPY RENTERS

2k+ VERIFIED OWNERS

24/7 SUPPORT

Luxury Villa — Banjara Hills
₹25,000 /mo
4 Beds • 3 Baths • 2,800 sqft
Verified Available

Top Rated

10. Testing

- Manual testing for UI responsiveness using Chrome DevTools. API testing performed using Postman.

11. Screenshots or Demo

- Demo Link: <https://househunt-demo.surge.sh/>

12. Known Issues

- Property image uploads may take slightly longer on slow internet connections.

13. Future Enhancements

- Integration of a payment gateway for secure rent transactions.
- In-app real-time messaging between owners and renters.
- Virtual 360-degree property tours.
