

User Acceptance Testing (UAT) Template

Date	July 5 – July 9, 2026
Team ID	GRP-001
Project Name	House Rent
Maximum Marks	100

Project Overview:

Project Name: House Rent

Project Description: A full-stack MERN web application that connects property owners with potential renters. Owners can list properties, manage bookings, and approve/reject renter requests. Renters can browse listings, book properties, and track their booking status in real time.

Project Version: 1.0.0

Testing Period: July 5, 2026 to July 9, 2026

Testing Scope:

- User Registration & Login (Renter / Owner roles)
- Property Listing – Add, Edit, Delete by Owner
- Property Search & Filter by Location, Price, and Type
- Property Booking by Renter
- Booking Approval / Rejection by Owner
- Booking Status Tracking by Renter
- Owner Dashboard – View and Manage All Bookings
- Renter Dashboard – View My Bookings
- Image Upload for Property Listings
- Responsive UI across Desktop and Mobile
- As a Renter, I can register, log in, search properties, and book them.
- As an Owner, I can list properties, upload images, and manage booking requests.
- As an Owner, I can approve or reject renter booking requests.
- As a Renter, I can view the real-time status of my bookings.
- As an Owner, I can ensure only one renter is approved per property per date slot.

Testing Environment:

URL/Location: <https://househunt-demo.surge.sh/>

Credentials (if required): Renter – renter@test.com / [Test@123](#) | Owner – owner@test.com / [Test@123](#)

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	User Registration	1. Navigate to /register 2. Fill in name, email, password, and role (Renter/Owner) 3. Click "Register"	User account is created; redirected to dashboard	User account created successfully; redirected to correct dashboard	Pass
TC-002	User Login	1. Navigate to /login 2. Enter valid email and password 3. Click "Login"	User is authenticated and directed to role-based dashboard	Login successful ; correct dashboard displayed based on role	Pass
TC-003	Owner Adds a Property Listing	1. Login as Owner 2. Click "Add Property" 3. Fill in title, description, price, location, type 4. Upload images 5. Click "Submit"	Property listed and visible to renters on search page	Property listed successfully and appeared in search results	Pass
TC-004	Property Search & Filter	1. Login as Renter 2. Enter location in search bar 3. Apply price range and property type filters 4. Click "Search"	Filtered list of matching properties is displayed	Correct filtered results returned based on input criteria	Pass
TC-005	Renter Books a Property	1. Login as Renter 2. Open a property listing 3. Select check-in and check-out dates 4. Click "Book Now"	Booking request submitted with "Pending" status	Booking submitted; status shown as Pending in Renter dashboard	Pass
TC-006	Owner Views & Approves Booking	1. Login as Owner 2. Go to Owner Dashboard → Bookings 3. Select a pending booking 4. Click "Approve"	Booking status changes to "Approved"; renter can see updated status	Booking status updated to Approved; visible in Renter dashboard	Pass
TC-007	Owner Rejects a Booking	1. Login as Owner 2. Go to Owner Dashboard → Bookings	Booking status changes to	Booking rejected; status updated	Pass

		3. Select a pending booking 4. Click "Reject"	"Rejected"	correctly in both dashboards	
TC-008	Renter Views Booking Status	1. Login as Renter 2. Go to "My Bookings" 3. Check the status of submitted bookings	All bookings shown with correct status (Pending/ Approved/ Rejected)	Booking statuses displayed accurately	Pass
TC-009	Owner Edits a Property Listing	1. Login as Owner 2. Go to "My Listings" 3. Click "Edit" on a property 4. Update price and description 5. Save changes	Property details updated and reflected immediately on listing page	Property updated successfully; changes visible to renters	Pass
TC-010	Owner Deletes a Property Listing	1. Login as Owner 2. Go to "My Listings" 3. Click "Delete" on a property 4. Confirm deletion	Property removed; no longer searchable by renters	Property deleted and no longer appears in search results	Pass
TC-011	Image Upload for Property	1. Login as Owner 2. Add or Edit a property 3. Upload multiple images 4. Save	Images uploaded and displayed on the property listing detail page	Images uploaded and rendered correctly on listing detail page	Pass
TC-012	Responsive UI on Mobile	1. Open the app on mobile or DevTools mobile emulator 2. Navigate through Home, Listings, and Dashboard pages	All pages render correctly on small screens with proper layout	UI adapts correctly to mobile screen; navigation and forms usable	Pass
TC-013	Invalid Login Attempt	1. Navigate to /login 2. Enter incorrect email and password 3. Click "Login"	Error message displayed; user not authenticated	Error "Invalid credentials" shown; no access granted	Pass

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	Concurrent Booking Race Condition – Double Approval	1. Two renters (A & B) both book the same property for overlapping dates 2. Owner opens dashboard and sees two Pending requests 3. Owner quickly approves Renter A 4. Before the DB write commits, Owner also approves Renter B 5. Both bookings end up Approved for the same property and dates	High	Open	Critical data-consistency bug. The backend lacks atomic locking when approving bookings. Recommended fix: use a DB transaction that checks for any existing approved booking for the same property and date range before committing a second approval. Alternatively, auto-reject all other pending bookings once one is approved for the same slot.
BG-002	Booking status not auto-refreshed without manual page reload	1. Renter submits a booking and stays on "My Bookings" page 2. Owner approves the booking from their dashboard 3. Renter's page still shows "Pending" until manually refreshed	Medium	Open	The Renter dashboard does not use real-time updates (e.g., WebSocket or polling). Socket.io integration or periodic

					polling is recommend ed so renters see status changes without a manual reload.

Sign-off:

Tester Name: Chandan

Date: July 9, 2026

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
